

WHY

CHOOSE CLOTH DIAPERS?

Here are a few reasons...

HEALTH

- Disposable diapers contain traces of the carcinogenic toxin, Dioxin.
- The EPA lists Dioxin as the most toxic of all cancer-linked chemicals.
- Dioxin is banned in most countries, but not the U.S..
- Disposable contain sodium polyacrylate, a type of super absorbent polymer (SAP).
- SAP was banned from tampons due to links to toxic shock syndrome.

environment

- An estimated 27.4 billion disposable diapers are consumed every year in the U.S..
- A single disposable diaper may take 250-500 years to decompose.
- Over 92% of all single-use disposable diapers end up in a landfill.

COST

- Americans spend about 7 billion dollars on disposable diapers every year.
- The cost of cloth diapering is about one-tenth the cost of buying disposables.
